

# Using the Files and Settings Transfer Wizard

from Microsoft Help and Support

The Files and Settings Transfer Wizard **helps you move your data files and personal settings from your old computer to your new one**, without having to go through much of the same configuration you did with your old computer. For example, you can take your personal display properties, folder and taskbar options, and Internet browser and mail settings from your old computer and place them on the new one. The wizard will also move specific files or entire folders, such as My Documents, My Pictures, and Favorites.

Open the Files and Settings Transfer Wizard.

- To open the Files and Settings Transfer Wizard, click **Start**, point to **All Programs**, point to **Accessories**, point to **System Tools**, and then click **Files and Settings Transfer Wizard**.
